

The Billionaire's Contract Bride

by Alison Reid

She was never meant to be his.

After her mother's death, everything in her life fractures—including the fragile relationship with a father she's never truly trusted. When his financial desperation collides with her unexpected inheritance, a deal is struck behind her back.

Marry a powerful billionaire. Secure her father's future. She refuses—until reality leaves her no choice.

Cold. Controlled. Untouchable.

That's what she expects from her new husband.

Instead, she gets something far more dangerous.

Patience. Restraint.

A man who sees her too clearly—and touches her like she's something worth protecting.

What begins as a contract starts to feel real.

Until one night changes everything.

She sees something she can't unsee.

A betrayal she can't forgive.

So, she walks away from the marriage that was just beginning to feel like her own.

But the truth she believes... isn't the truth at all.

And when it finally comes to light, it won't just change everything—it will force her to decide if she can trust the man she married... or lose him forever.

Tropes:

-  Contract Marriage
