

The Billionaire's Unexpected Heir

by Alison Reid

She made a promise to protect a child... not to face the man who could take her away.

When her sister dies, Calista Georgiou becomes everything to a little girl who has already lost too much—mother, stability, and the life she once knew.

Chloe is hers now. In every way that matters.

But one discovery changes everything.

A sealed letter. A name.

And a truth her sister took to the grave.

Nicholas Drakos.

Powerful. Untouchable. A billionaire who built his empire on control—and has no place in his life for children... or love.

Until a paternity test proves the impossible.

Now Nicholas Drakos is faced with a daughter he never knew existed... and the woman who has already claimed her heart.

Calista won't let anyone disrupt Chloe's life—not even the man who shares her blood.

But Nicholas doesn't walk away from what's his.

And as two worlds collide—one built on ruthless power, the other on quiet sacrifice—the battle for a child becomes something far more dangerous... because the deeper Nicholas steps into their lives, the harder it becomes to ignore the one thing he never planned for—

A love he can't control.
